

Happyneuron

Cognitive therapy tools to
enhance your practice

happyneuronpro.com

At Happyneuron, we aim to save you time, money, and energy so you can focus on what matters most: helping your clients.

Since our founding in 2000...

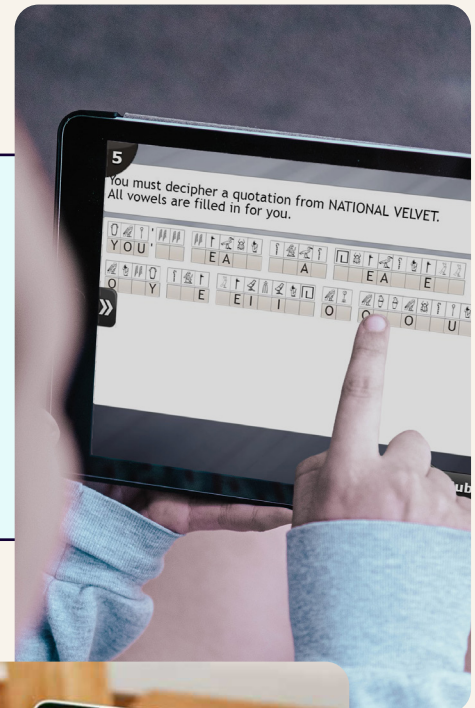

12,000+
clinicians

300 million+
exercises completed

Countless
lives impacted

What makes us different:

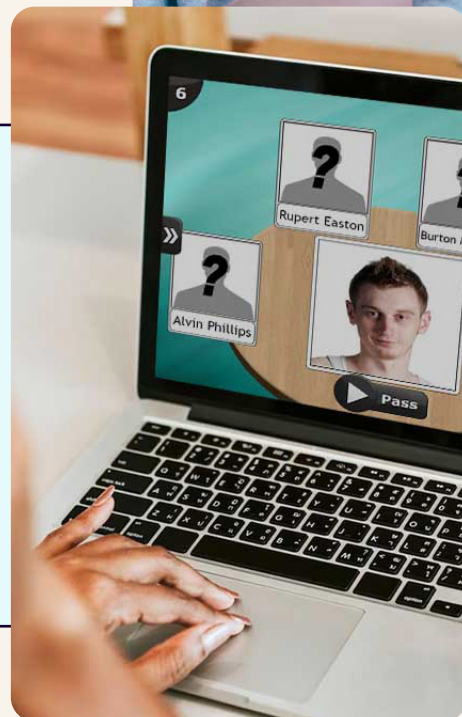

We were founded by a collective of cognitive experts in France to re-imagine the technology for speech therapists and neuropsychologists. Since then, our tool has been adapted to be used around the world by all kinds of clinicians in cognitive therapy.

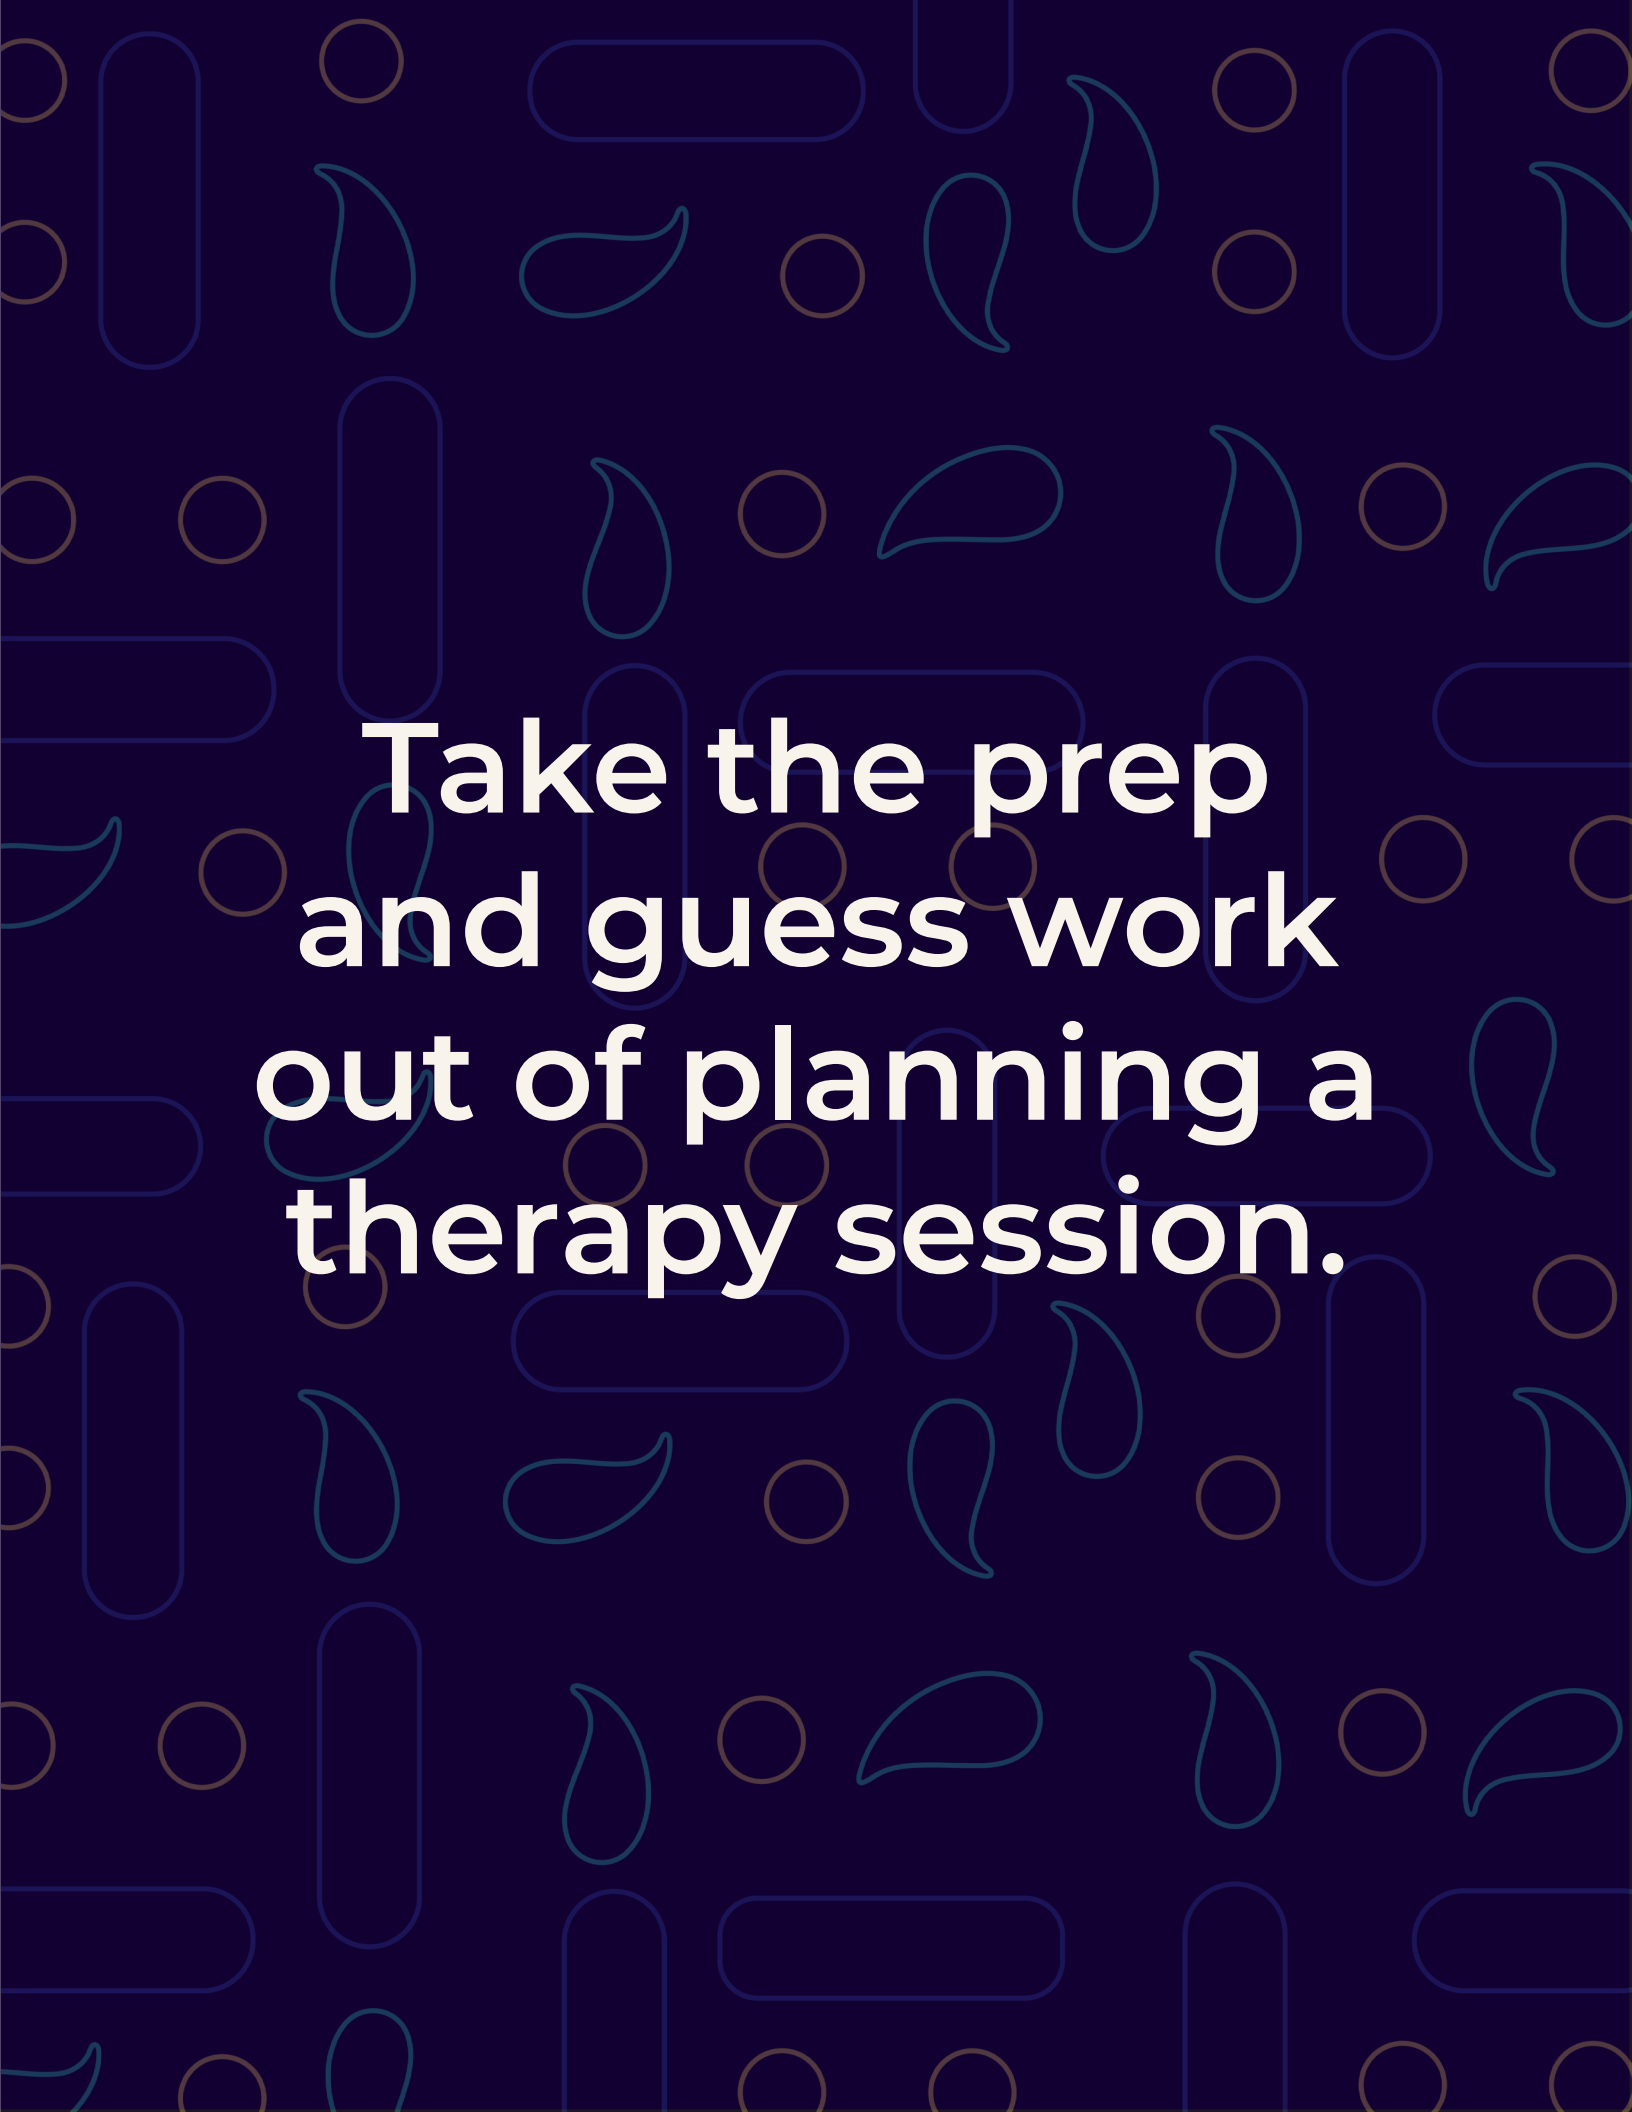

Research is who we are.

Happyneuron is proud to support an international community of researchers and participate in the pursuit of understanding cognitive rehabilitation. Within the last 20 years, we have partnered with many research institutions on five continents.

Dr. Christopher Bowie is one of the top researchers utilizing our tool.

The background is a dark blue field filled with a repeating pattern of abstract, hand-drawn shapes. These shapes include circles, rounded rectangles, and teardrop-like forms, some in a lighter blue and others in a golden-brown color. The text is centered in the middle of the image.

**Take the prep
and guess work
out of planning a
therapy session.**

Benefits for Clinicians

A larger and ever growing collection of cognitive exercises and tools, easily accessible for therapeutic needs.

Automatic printable reporting that instantly saves you time and money.

Adaptable exercises that are **customizable** for every patient's unique needs.

No additional equipment needed. Our 100% online platform makes accessibility a breeze for any therapy style.

We enhance to your practice - we don't replace you. Only you can provide the cognitive therapy that changes lives. Our tools will help you do it with more ease, in less time.

We're here for you! Our Product Specialists can answer your questions and help you **develop a plan** for using our tools with your clients.

Innovation is our foundation. **70% of all speech therapists in France use our tools** in their daily practice.

Hear what clinicians have to say about our tools

Our goal is to
make clinicians'
lives easier so
they can focus on
transforming lives.

"Happyneuron Pro is very elegant because it actually pinpoints cognitive areas and it gives really strong stimulus items, and that's how you actually build cognitive functions."

Dr. Mary Ann Keatley
Ph.D., CCC

"I found that I was building a lot of the programming myself. I would spend a lot of time in program planning trying to find the activities that I want to use. I find that Happyneuron Pro does the work for me. It is easy to access and I like the information portion of it."

Karin Harrison,
West Shore Stroke
Recovery

"I can delegate Happyneuron Pro to my clinical assistant. They are able to use it with clients who may not need as much assistance as others. However, if a client had more significant difficulties, I am able to work with them".

Dr. Taher Chugh,
Sports Medicine, MD,
CCFP(SEM), FCFP.
